MISSION STATEMENT

“Corona virus makes you poor
but RICHVIRUS makes you rich.”

Covid-19 made people lose their job and they ended up being bankrupted. The vision of Rich virus is to protect people , recover and enable them to leverage asset with blockchain technology. The blockchain technology is secured and transparent. Rich virus makes it easy for people to earn from home.

INTRODUCTION

The crypto currencies have got lot of advantages than the traditional fiat currencies. In spite of its advantages like transparency, security, and fast transactions, cryptocurrency has not been accepted world wide. The major reason for this is the inability of crypto currency for the direct purchase of goods and services. Many people believe that cryptocurrency is some sort of luxury and they exempt themselves from using it.

We take immense pleasure in introducing you Rich Virus token, a cryptocurrency that serves as your pocket friendly alternative to the traditional fiat currencies. Now you can spend your cryptocurrency on any purchase around the globe. Rich Virus token is being listed in almost all the leading cryptocurrency exchanges. So, people can easily get access to our cryptocurrency on the go.

The process in mining your own cryptocurrencies is complex and every individual is not capable of mining currencies which requires a lot of computational power and expensive hardware. Buy Rich Virus token gets into the market as solution. People in need of cryptocurrencies can be benefited.

Rich Virus token will help you make transactions umindful of your geography. You are not only limited to your regional currencies. With Rich Virus token, you can make borderless transactions that can happen without any transaction or conversion fee. Paying with Rich Virus token gives you a whole new level of experience. The transactions with Rich Virus token are safe since it do not involve any intermediaries like bank or other third party payment processors. To be precise, your payments are anonymous.

What is DEFI?

Defi is simply an acronym that stands for Decentralized Finance. The buzz word in the cryptocurrency world today.

The main aim of DeFi is to give users full control over their assets, and because of the decentralization disposition of blockchain technology this is very possible.

Defi is about having no central control of your finances. That means the issue of trust is eliminated, users of a decentralized system are empowered and can make financial decisions quickly without interferences.

Users of a decentralized financial system can trade, purchase, and invest freely and securely than in the traditional central systems as we know it.

It's upon the aforementioned notions that the Rich virus network operates.

We are creating a decentralized ecosystems void of central control where users whether businesses, individuals or even governments can conduct their daily financial operations in a safe, fast, and efficient way, with reduced costs.

Finally we believe Defi will attract main stream businesses and financial institutions to form synergies, partnerships and collaborations with the cryptocurrency projects and this could spark off massive adoption of cryptocurrency. We want to be at the forefront of this.

We are still in the beginning of this blockchain revolution, but it is quickly gaining steam. Why?

Because blockchain cuts out all the excess transactions that once took up significant costs. Without a need to trust third-party systems for storage and authentication, blockchain allows for greater transparency and security within transactional relationships. Now, the blockchain idea has been applied far beyond just transactions. Decentralized applications (or 'dApps' for short) came into the picture, allowing for these same genius properties to be applied to everyday applications we use on our phones and computers.

No longer do we need conglomerates hoarding our data nor do we need to rely on them for validation; instead, a distributed, decentralized ledger would be able to validate itself by the virtue of its underlying technology. Just think of the potential blockchain technology has to fundamentally alter every aspect of our lives.

Of all the aforementioned advantages of blockchain technology we take just four to form the foundation of the Rich virus Network; Reduced Cost, Elimination of third-party, Security and Financial Empowerment.

Problem Statement

The pandemic has brought a sudden downfall in the economic status of people. They tend to lose their job. Their investment folios are painted red. The technology has grown and the world renowned systems are being digitalized. Today, we communicate instantly with anyone across the globe for pennies on the dollar. Why do we still need to pay filthy commissions on the transactions we make? Why do we believe some unsecured mode of transactions when we are dealing with the real world market? This covid-19 has made people poor and they suffer a lot to get the basic needs even.

Rich Virus token- the solution

With the industrialization and involvement of technology, digital currencies are gaining an upper hand over others. One such currency is Rich Virus token. The advancements in the blockchain technology lead to the development of cryptocurrency. The ultimate aim of Rich Virus token is to be the best replacement for traditional currencies and Rich Virus token has undoubtedly got all such qualities to outdate the traditional fiat currencies. The major reason for issuance of Rich virus token is that it will help people to get rich and overcome this tough situation.

Protection from inflation

The major issue that hinders people from moving to cryptocurrency is the inflation. This inflation will lead to the decrease in the value of that particular coin. So, to have a stable value, the circulation or supply of Rich Virus token is limited. This will keep the demand for coin in the market and thus there will be no drop in the value. Rich Virus token will keep up with the market and, in the long run, prevent inflation.

Self-governed and managed

The development of any cryptocurrency depends on the governance and maintenance. The transactions made using Rich Virus token are stored by developers/miners on their hardware, and they get rewards for doing so. Since the miners are getting paid for it, they keep transaction records accurate and up-to-date, keeping the integrity of the cryptocurrency and the records decentralized.

Secure and private

When you opt for privacy and security, Rich Virus token has always been the best option. The ethereum blockchain is based on different mathematical puzzles, which are hard to decode. This makes Rich Virus token more secure than ordinary electronic transactions. Rich Virus token for better security and privacy, use pseudonyms that are unconnected to any user, account or stored data that could be linked to a profile. Rich Virus token is built on the top of ethereum blockchain which is a decentralized shared public ledger. It is impossible for an individual in the blockchain network to alter the data in the blocks. The transaction details will be in all the blocks that are located in every nook and corner in the world. Tampering of transaction details is highly impossible when the transaction is made using Rich Virus token.

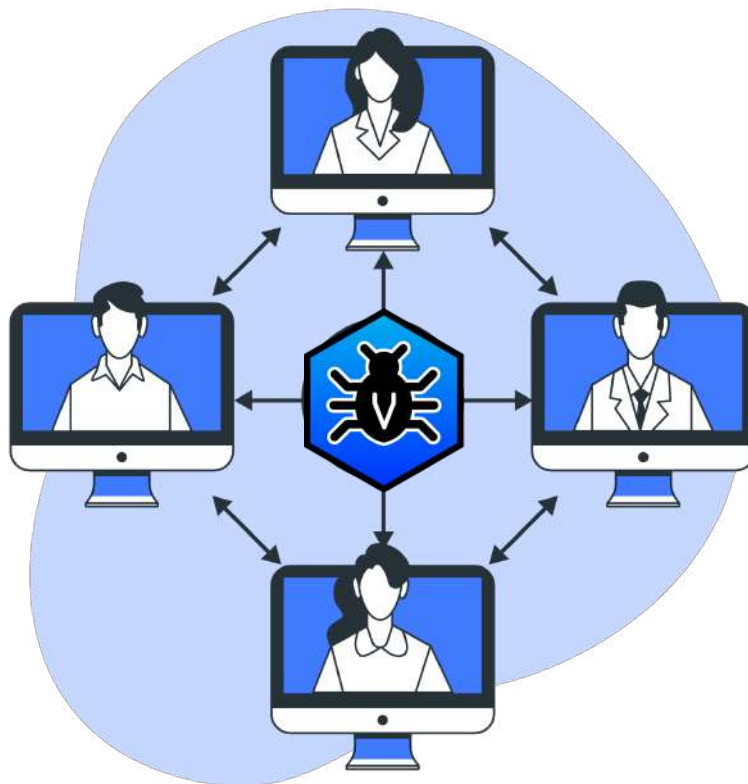

Currency exchanges can be done easily

You need not be a geek or nerd to convert Rich Virus token to fiat or vice versa. Rich Virus token can be bought using your regional currencies like the US dollar, European euro, British pound, Indian rupee or Japanese yen. Rich Virus token is being listed in various exchanges and you can easily get access to Rich Virus token with no transaction fees.

Decentralized

The major pro of Rich Virus token is that it is mainly decentralized. It is not owned by any single entity or user. The authority is just wide spread. This will make sure that no one in the network ethereum blockchain can tamper the data. The transaction data are safe. The decentralization helps keep the currency monopoly free and in check so that no one organization can determine the flow and the value of the coin, which, in turn, will keep it stable and secure, unlike fiat currencies which are controlled by the government.

Cost effective mode of transactions

One of the main advantages of Rich Virus token is that it can be used to make transactions across borders. With the help of Rich Virus token, the transaction fees paid by a user is reduced to negligible or zero. This is possible by the elimination of third party payment processors and banks that may ask for additional charges for verifying the transactions. Rich Virus token is untaxed.

A fast way to transfer funds

Rich Virus token is an optimal solution for transactions. Transactions, whether international or domestic in Rich Virus token, are lightning-fast. This is because the verification requires very little time to process as there are very few barriers to cross.

Anonymity

Another notable advantage of Rich Virus token is that the transactions you make are anonymous. When you send Rich Virus token to someone, the transactions are being recorded on the ethereum blockchain. This enhances transparency. But people always confuse anonymity with transparency when it comes to blockchain. The thing is the transaction is transparent but the doer and receivers are anonymous to the network. Entire network can know that someone sent 20 Rich Virus token to someone. But no one knows that it is you. This is possible because the person is involved in the transactions are identified by a wallet address instead of a name. So, Rich Virus token gives you privacy in what you do.

Technical Aspects of RCHV

- Rich Virus token is an ERC-20 token.
- These tokens represent a digital asset. In laymen terms, it is like digitizing a paper currency. It still has value but not a physical form.
- The difference between Rich Virus token and other cryptocurrencies like Bitcoin, litecoin, etc, is that Rich Virus token do not has its own blockchain but reside on top of the Ethereum blockchain.

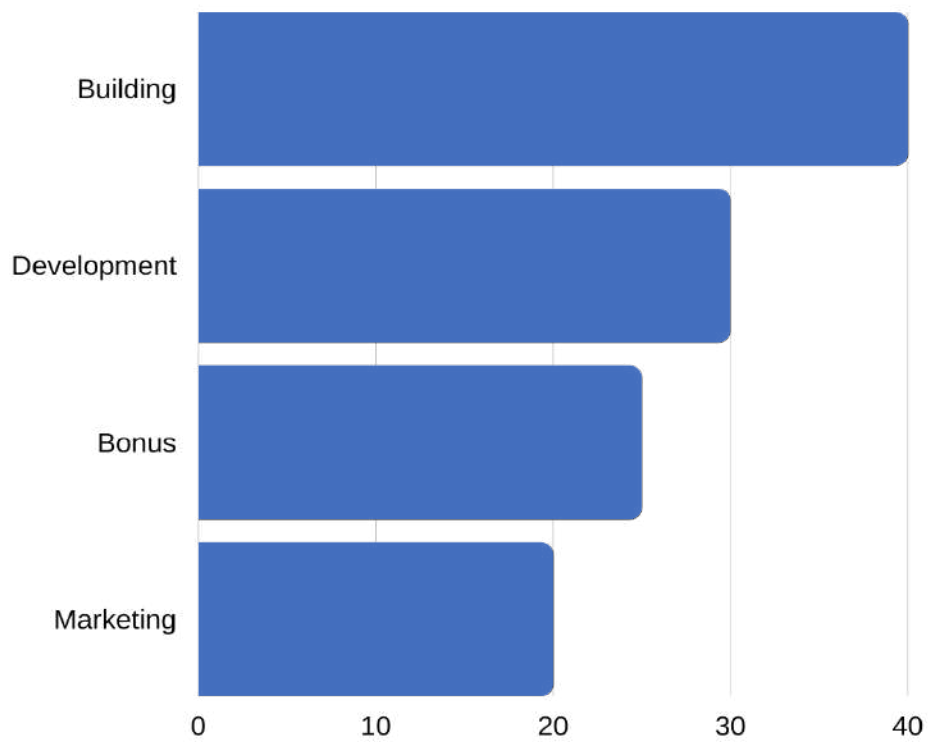

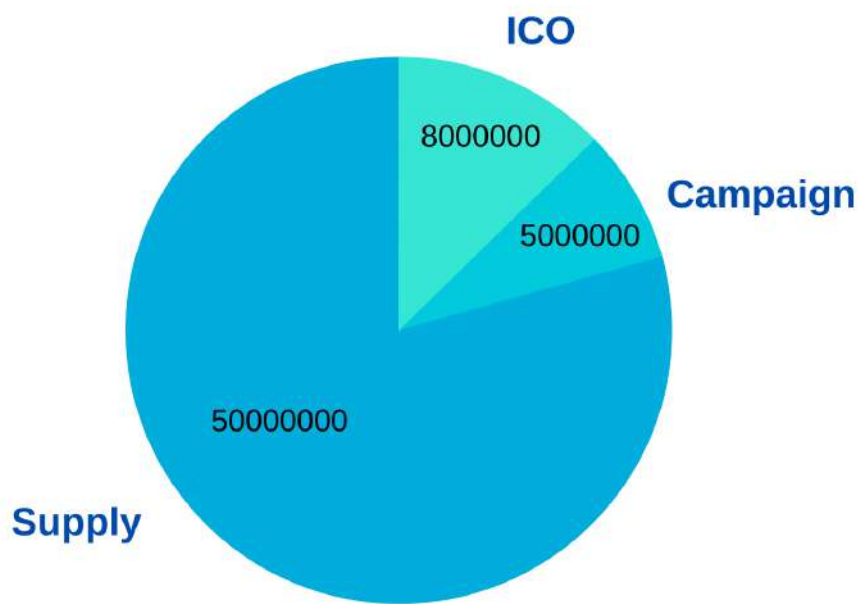

- Rich Virus token is created by writing a contract on the Ethereum blockchain. The contract is nothing but a piece of code. This is written using Solidity, a special language that is used for writing smart contracts.
- Rich Virus token is a utility token on the Ethereum blockchain. The Rich Virus token is a utility token for making all kinds of day to day personal and business transactions.
- Rich Virus token is not backed by any central authority and are intended and designed to be a currency for paying the daily needs.
- The principle of using Rich Virus token for transactions instead of traditional fiat currencies is simple, Rich Virus token lack the regulation of regular currency.
- When you make transactions with traditional currencies, you will be subjected to filthy unwanted fees. Also, you will be subjected to all sorts of stops and fees when you withdraw fiat currencies. But Rich Virus token enables you to spend anonymously without any fees.

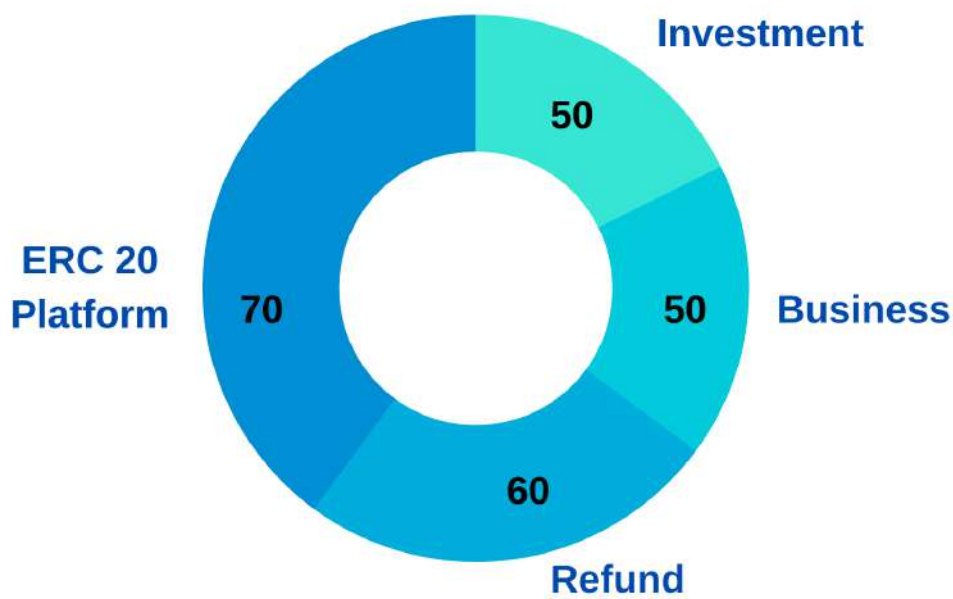

Why Rich virus is the most fitting solution for this situation?

Rich virus enhances leverage which is all about allowing users to borrow large sums than their minimum margin investments. In this current COVID-19 situation, market prices have been profoundly fluctuating. In this scenario, there is no better solution than a crypto leverage exchange, as your minimum investment is less, but the profits are higher, and with its exclusive options, risk-management strategies rightly used, you can conduct a risk-free, hassle-free business.

The demand and urge for cryptocurrency leverage is highly booming, and if you want to get rich, there is no better time than now. So, make use of this favourable opportunity i.e. Rich virus tokens, soonest and boost benefits and profits for your business.

Token Distribution

Tokenomics

TICKER	RCHV
TECHNOLOGY	ERC-20
TOTAL SUPPLY	50,000,000RCHV + ICO
DECIMAL	18

Token Information

RCHV Token is an Ethereum based token. You can search her out on etherscan with contract address:

0xc3F2f524013227F797D6f1FdD10e2faD97699b5C

Airdrop and Bounty

First, you can create account join our bounty program and join our Telegram channel and group for news. For our bounty program, you can endorse us via group, forum, or youtube if you have a big following and for a good feedback, we will give you 50RCHV up to 300RCHV. Please contact us at partner@richvirus.com

Signup and referral bonus

Earning RCHV token is very easy. The Rich virus network has planned to give a lot of free bonus periodically and when you sign up with this platform. The token holders can benefit with these free tokens. The benefits do not stop with this. Rich virus also makes the availability of referral bonus scheme. When someone joins the network with your affiliate link, you will be getting a bonus worth \$5.
